Cover photos: front, fly-fishing on the Upper Truckee River in the Lake Tahoe Basin Unit (USFS) for Lahontan cutthroat trout; back, California Department of Fish and Game Fisheries Biologist releases Paiute cutthroat trout *Onchorynchus clarki seleniris* into Silver King Creek, Caron-Iceberg Wilderness, Toiyabe National Forest following a rotenone reclamation project. Source: California Department of Fish and Game.

Contents

1. Introduction Brian J. Finlayson	1
2. Rotenone Neutralization Methods Donald L. Archer	5
3. Knife Lake and Knife River Rehabilitation Project Timothy J. Brastrup	9
4. The Use of Rotenone to Restore Brook Trout in the Adirondack Mountains of New York—An Overview Leo Demong	29
5. Chemical Residues in Surface and Ground Waters Following Rotenone Application to California Lakes and Streams Brian J. Finlayson, S. Siepmann, and J. Trumbo	37
6. Northern Pike Control at Lake Davis, California Dennis P. Lee	55
7. Overview of a Large-Scale Chemical Treatment Success Story: Strawberry Valley, Utah Leo D. Lentsch, Charles W. Thompson, and Robert L. Spateholts	63
8. American Fisheries Society Rotenone Stewardship Program Rosalie A. Schnick	81
9. Programmatic Approach for Rotenone Projects Funded Through the Federal Aid in Sport Fish Restoration Program—Options for Balancing Risk with Environmental Compliance and Administrative Efficiency Ray Temple	87
10. Utah’s Procedure for Mixing Powdered Rotenone into a Slurry Charles W. Thompson, Craig L. Clyde, Douglas K. Sakaguchi, and Leo D. Lentsch	95
11. Utah’s Rotenone Sandmix: A Formulation to Maintain Fish Toxicity in Seeps or Springs Robert L. Spateholts and Leo D. Lentsch	107
12. The Use of Rotenone in National Forests Donald A. Duff	119
